Team member 2	Harini Sree.S
Team member 3	Harini.S
Faculty Mentor	Vinoth Kumar.R
Industry Mentor	Baradwaj.I.L
Project Name	IoT Based Safety Gadget for Child Safety Monitoring and Notification

The screenshot displays the IBM Watson IoT Platform dashboard. The top navigation bar includes tabs for 'Browse', 'Action', 'Device Types', and 'Interfaces'. Below this, there are buttons for 'All Devices' and 'Diagnose'. A descriptive text states: 'This table shows a summary of all devices that have been added. It can be filtered, organized, and searched on using different criteria. To get started, you can add devices by using the Add Device button, or by using API.' Below the text is a search bar labeled 'Search by Device ID' and a 'Device Simulator' toggle switch. The main content area features a table with the following columns: Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. The table contains four rows of data:

Device ID	Status	Device Type	Class ID	Date Added	Descriptive Location
11	Disconnected	Childtracker	Device	Nov 19, 2022 4:38 PM	
31	Disconnected	H2CB	Device	Nov 17, 2022 10:02 AM	
31	Disconnected	gps	Device	Nov 19, 2022 4:39 PM	
H2CB_1	Connected	H2CB	Device	Nov 19, 2022 4:38 PM	

At the bottom of the table, it indicates 'Items per page 50' and '1-4 of 4 items'. A notification at the bottom right states '2 Simulations running'. The bottom of the image shows a Windows taskbar with various application icons and a system tray displaying the temperature (28°C), weather (Haze), and time (16:39, 19-11-2022).
